FMC Corporation Announces Butyllithium and Specialty Organics Price Increases

CHARLOTTE, N.C., August 8, 2013 – FMC Corporation announced today that effective September 1, 2013, or as contracts permit, it will increase global pricing for n-butyllithium and s-butyllithium and all specialty organic products by 4 percent. Increases apply to all standard and non-standard pricing.

“During 2013 continued increased transportation costs including fuel and bunker surcharges in addition to strategic raw material price pressures has made this price increase necessary despite our continued effort to manage costs across the FMC Lithium division and our four butyllithium sites,” said Chris Senyk, global marketing director for FMC Lithium.

FMC Lithium, under the FMC Minerals business segment, serves markets including battery and energy, air treatment, construction, energy, fine chemicals, glass and ceramics, greases and lubricants, pool-water treatment, and polymers. Information is available at fmclithium.com. The company may be reached by phone at 888/LITHIUM or 704/426-5300, by fax at 704/426-5370, or by email at lithium.info@fmc.com.
