4. First Aid Measures

4.1 Description of First Aid Measures

- EYES:** Hold eyelids open and rinse slowly and gently with a stream of water for 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue to rinse the eye. **Call a Physician or Poison Control Center for treatment advice.**
- SKIN:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Wash with plenty of soap and water. **Call a Physician or Poison Control Center for treatment advice.**
- INGESTION:** **Immediately call a Physician or Poison Control Center for treatment advice.** Do not induce vomiting unless instructed by Physician or Poison Control Center. Promptly drink large quantities of water if able to swallow. Do not give anything by mouth to an unconscious person. Avoid Alcohol.
- INHALATION:** Remove person to fresh air. If not breathing, call 911 or ambulance and then give artificial respiration, preferably mouth-to-mouth, if possible. **Call a Physician or Poison Control Center for treatment advice.**
 Have the product container or label with you when calling the poison control center or doctor, or going for treatment.

4.2 Most Important Symptoms and effects, both acute and delayed

This product is corrosive.

4.3 Indication of any immediate medical attention and special treatment needed.

Notes to medical doctor:

Lithium hypochlorite is corrosive to eyes, skin and mucous membranes with chemical burns (caustic). Treatment is dilution/flushing of site with copious amounts of water with controlled removal of exposure followed by symptomatic and supportive care to maintain life functions. Consideration should be given to careful endoscopy as stomach or esophageal burns, perforations or strictures may occur. Probable mucosal damage may contraindicate the use of gastric lavage. Careful gastric lavage with an endotracheal tube in place should be considered. Observation may be warranted. Medical advice – 303 595 9048 (collect)

5. Fire-Fighting Measures

- 5.1 **Extinguishing media** Use water only. Do not use dry chemical, CO₂ or Halon.
- 5.2 **Special hazards arising from the substance or mixture**
Hazardous combustion products Oxygen and toxic chlorine vapors. Corrosive lithium hydroxide dust.
General Hazard Oxidizer. Contact with easily oxidizable or combustible materials can cause fire or explosion upon ignition from any source.
Properties contributing to Flammability Strong oxidizer. Contact with combustible material may cause fire.
Flashpoint Not applicable
Flammable limits in air Not applicable
Auto ignition temperature Not applicable
Sensitivity to static discharge Not applicable
Sensitivity to static impact Not applicable
- 5.3 **Advice for fire-fighters**
 Wear full protective clothing and self-contained breathing apparatus (SCBA) approved for fire fighting. This is necessary to protect against the hazards of heat, products of combustion and oxygen deficiency. Do not breathe smoke, gases or vapors generated.
